

# Regina Bypass P3 Paving Project

**Husky Asphalt proves it is the ideal P3 asphalt supply partner for significant transportation infrastructure projects**

## OVERVIEW

<b>Location</b>	Regina, Saskatchewan
<b>Husky's role</b>	<p>Husky Asphalt collaborated with construction partners in the Regina Bypass P3 consortium during the bidding process. Once chosen as the asphalt supplier of choice, Husky worked with them to:</p> <ul style="list-style-type: none"><li>· Create a customized PMA mix design to withstand traffic volumes, intense seasonal climate changes, and a 30-year maintenance period</li><li>· Deliver a reliable, steady supply of quality asphalt for the entire 4-year construction phase</li><li>· Consult and collaborate with the consortium partners throughout the project, from beginning to end</li></ul>
<b>Customer</b>	Saskatchewan Ministry of Highways and Infrastructure (Sask MHI)
<b>Partners</b>	Regina Bypass consortium
<b>Construction completion</b>	July, 2015
<b>Construction start date</b>	October, 2019
<b>Maintenance period</b>	2019 - 2049

## CHALLENGE

The Regina Bypass is the largest transportation infrastructure project in Saskatchewan history. The Saskatchewan Ministry of Highways and Infrastructure (MHI) chose to follow a Public-Private Partnership (P3) model to build and maintain the Regina Bypass because they determined there are savings to taxpayers when using a P3 approach.

Husky Asphalt was chosen during the bid process to be the P3 asphalt supplier. Why? Because our proven track record meant we could meet the challenges of this significant paving project:

- Create a customized PMA mix design to withstand traffic volumes, intense seasonal climate changes, and a 30-year maintenance period
- Deliver a reliable, steady supply of quality asphalt for the entire 4-year construction phase
- Consult and collaborate with the consortium partners throughout the project, from beginning to end

## IMPACT

Husky Asphalt helps its customers build better roads. Not just a leading asphalt supplier, Husky's technical expertise and consultative approach leads to successful partnerships that move the road building industry forward.

*"It's been rewarding and it's been challenging to deliver on this custom asphalt solution for this large infrastructure project. But we've been able to achieve and meet the goals and expectations of the design build team,"*

Brett Lambden, TS&I Manager, Husky Asphalt.
